---

Hello OEA,

The safety and health program has received the 14<sup>th</sup> floor indoor air-quality report and attached it for each of you to see prior to our move.

EHS International conducted indoor air quality testing of the following:

- Carbon Monoxide
- Formaldehyde
- 4-PCH
- Total Volatile Organic Compounds

The samples were sent to Galson Laboratories for analysis which resulted in a "PASS" status.

Please feel free to look through the report and if you have any questions or concerns, feel free to contact me at 3-0241.

Thanks,  
Grady Maxwell, MPH
